

eGrabber Recorder

High-performance video recording library

At a Glance

- Highly optimized video recording to disk
- Recording at bandwidth compatible with fastest cameras
- Long term recording, limited only by the disk size
- Easy to integrate into EGrabber applications
- Compatible with Windows

Benefits

Description

Recorder is an optional library of eGrabber that provides video recording services to hard drives. It is compatible with hard disk drives (HDD) as well as solid state drives (SSD).

Easy to use

The Recorder library is easy to use and relieves the user of having to care about file size, name, or format.

High performance

Recorder focusses on performance; the library has been highly optimized to exploit the maximum bandwidth of disks. The actual recording throughput will of course depend on the disk capabilities.

Make your own recorder

Fast SSDs (such as NVMe PCIe Gen 3 x8 or Gen 4 x4 M.2 SSDs) have become affordable. Their bandwidth is now compatible with the requirements of the faster cameras available.

Compatible with Neo licensing system

Compatible with Windows
